

DATA VISUALIZATION TOOL

STAR TECHNOLOGIES is developing the Data Visualization Tool (DVT) - a software package designed to mainstream your data and export it to a variety of formats. With DVT you can quickly add visualization to your legacy software applications, as well as provide a go-forward route for new applications and projects. DVT also includes the Microsoft .Net compiler for unlimited flexibility by allowing scripting in your preferred programming language.

DVT INCLUDES:

- 3D Visualization using cutting edge Microsoft's XNA technology.
- Built-in scripting for all .Net languages such as C#, VBScript, C.
- Drag-and-drop variables for output flexibility

IMPORT DATA FROM:

- SQL-compliant databases
- ASCII or binary files
- TCP/IP Socket Connections
- Real-time data streams

VISUALIZE YOUR DATA WITH:

- 3D visualization in multiple environments
- Instrument panels of your choice
- 2D Mercator
- Multiple plotting options
- Monitor pages of current values

EXPORT DATA TO:

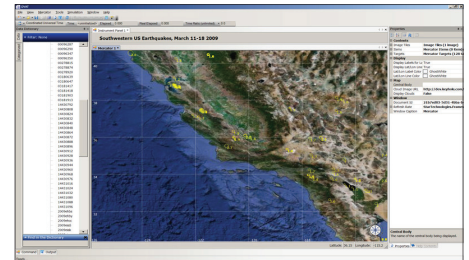

- SQL-Compliant Databases
- Log Files
- TCP/IP Socket Connection

COMING SOON!

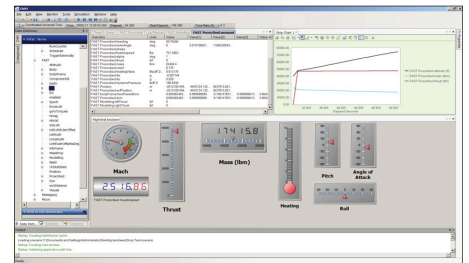

Retail Price: \$5,039 (includes first year of annual maintenance).

Annual Maintenance Contracts: \$840 per year (after the first year) to keep your DVT software updated with the latest releases.
